## Summary

---

As a Business Analyst with a statistical foundation (Bachelor of Science in Statistics), I excel at dissecting complex business challenges and crafting innovative, data-powered solutions. My expertise includes successfully designing and implementing user-friendly Power BI dashboards to provide secure, real-time insights for financial and executive teams. I also have an experience in structuring and configuring critical ERP modules (Finance, HR, Admin), which has directly led to significant gains in operational efficiency and substantial cost reductions (e.g., 10% in operational costs and 15% in project management efficiency). I'm driven to empower organizations by transforming intricate information into clear, actionable strategies that fuel sustainable growth.

## Education

---

- **Bachelor of Statistics** (2019 - 2022): **Grade 8.4 CGPA**, K.T.H.M college, Pune University
- **Certificates:** Business Analysis Foundation, Google Data Analytics Certificate, BIM Training Course, Mastering Key Performance Indicators (KPIs).

## Work Experience

---

### **Business Analyst**

Pentacle Consultants (I) Pvt Ltd.  
Lower Parel (Mumbai)

October 2023 – Current

- Played a key role in ERP architecture planning by analyzing the functional needs of the Project Management team centralizing drawings and correspondence on a single server, enabling task-specific assignments, and automating project tracking. This resulted in a 15% efficiency gain and enhanced visibility for stakeholders through real-time project status reports.

- Designed and configured Admin and HR modules with integrated analytics, enabling a 25% boost in workflow efficiency and reducing operational costs by 10% through improved process transparency and data accessibility.
- Developed and implemented a Finance module dashboard by assessing the financial reporting needs of the Accounts team and senior management, enabling secure access to key metrics and enhancing visibility into the organisation's financial performance.
- Collaborated with the Chief Financial Officer on merger and acquisition activities for three consultancy service companies conducting preliminary data analysis and due diligence, and presenting actionable insights to support strategic decision-making and client negotiations.
- Drove tender opportunity identification and submission within the infrastructure project management consultancy sector across India, coordinating with government authorities to align project requirements with consultancy services and ensuring successful bid submissions on government portals.
- Managed end-to-end tender submissions via internal ERP system, overseeing document preparation and achieving 20+ successful bid uploads on government platforms nationwide.
